

Moulded parts

Accurate fitting of moulded parts – works with extreme temperatures

Successfully run your development projects.

Optimize processes and keep time and costs in check – with ULMAN Dichtungstechnik GmbH - as your committed and competent partner.

Our passion is to master your challenges.

We will provide you with a solution even in the most difficult of situations be it the cold Siberian climate or the blazing heat of a blast furnace. With more than four decades of experience in sealing technology and various applications, we are recognized as a reliable partner and are able to provide you with the necessary technical advice.

Are you missing very small seals for the development of a new dialysis machine

or does your gas-pipeline project require oversized seals? We will work together with you to create and deliver customized sealing solutions in a timely manner. Active project management will keep you updated and will allow you to inform your customers and clients of the status.

Benefit from our competence in production processes.

Our knowledge helps to save time and money. During your product-planning phase, we can provide advice on the design of the seal. For testing, we can provide reliable samples quickly.

We speak the same language and know the challenges you face.

We have implemented solutions for many different applications. Our customers appreciate our extensive know-how. Over 90% of them work in the field of automotive and electronic applications, the food and drinking water industry, marine and offshore technology, machinery, medical technology and hydraulic / pneumatic applications.

Assure yourself by using our material know-how.

No matter what material characteristics you require, we will find the right compound for your needs by using either elastomeric, thermoplastic or sintered materials like PTFE - even at borderline parameters.

Usage of approved and certified compounds.

For sensitive areas such as food, drinking water or gas applications as well as medical technology we are equipped with suitable compounds – all with official certification.

Profit from our customized distribution logistics.

We offer a customized distribution logistics appropriate for your processes. This will ensure a constant supply of materials when you need it the most, reducing your storage and waste disposal.

Ask for more!

You can expect more than just moulded parts from ULMAN Dichtungstechnik GmbH.
We are able to fulfill all of your company's requirements with high-quality parts.
Please contact our technical department to arrange an appointment to discuss your needs.
